17. Tap **APN type** and enter **mms** (kod nekih modela izabere se opcija mms)
18. Press the **Menu** key
19. Press **Save**

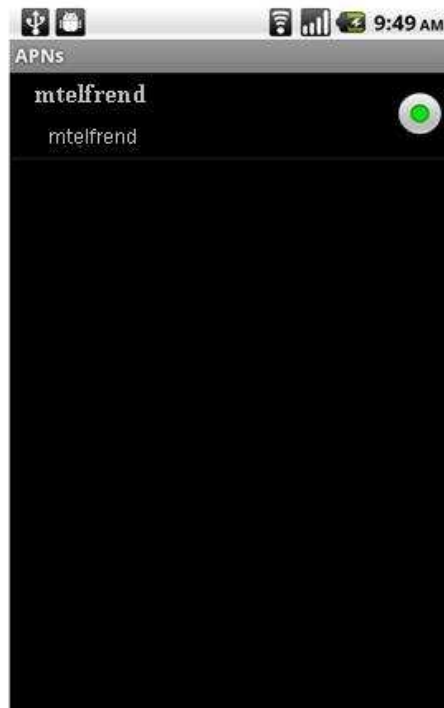

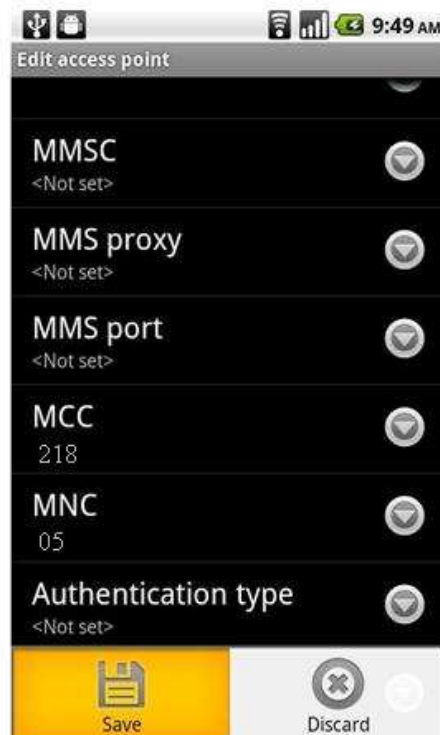

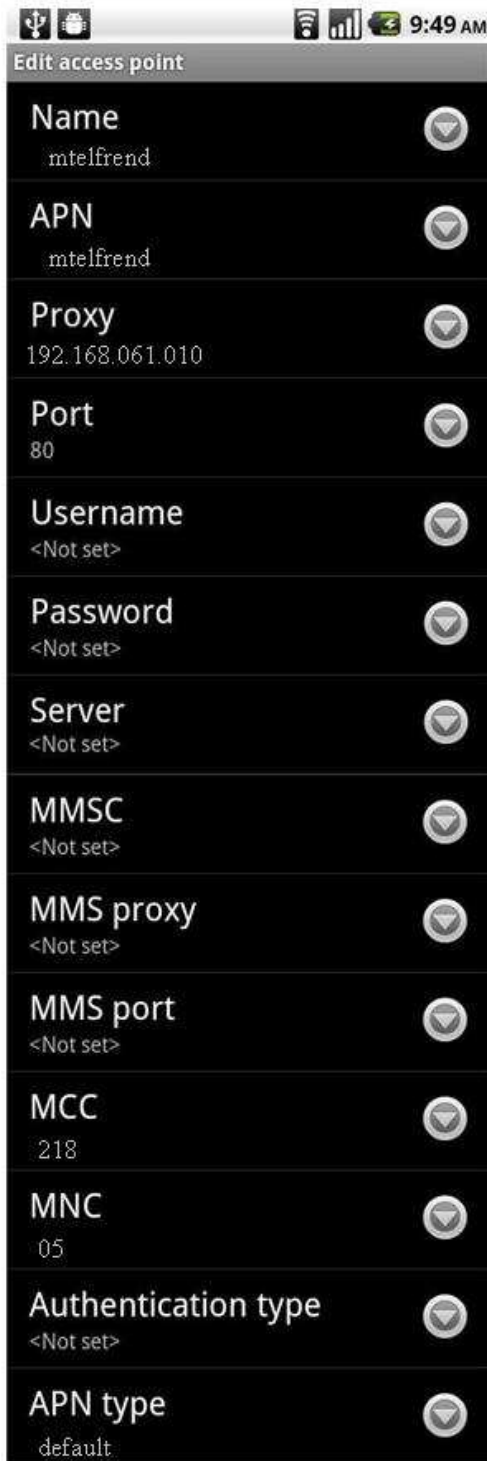

Ako imate neku od aplikacija za blokiranje apn-ova kao što je APNswitch, za vrijeme dok su apn-ovi isključeni dobićete samo notifikaciju da Vam je stigao mms i moći ćete ga downloadovati tek kad uključite apnove, isto je i sa slanjem mms poruka (možete ih slati samo za vrijeme dok su apn-ovi aktivni).

Prikaz podešavanja gprs/mms-a (žutim su prikazane opcije u koje treba ući)

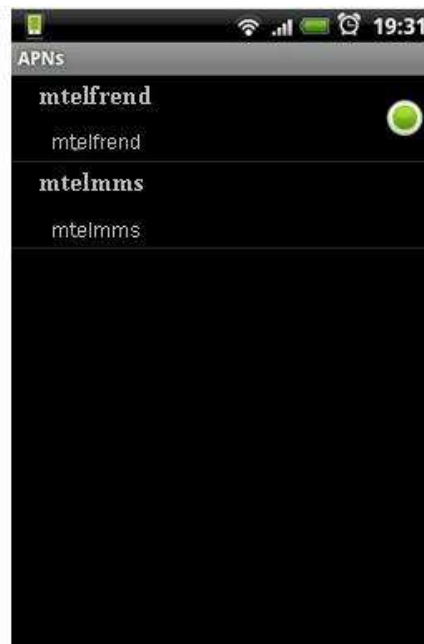

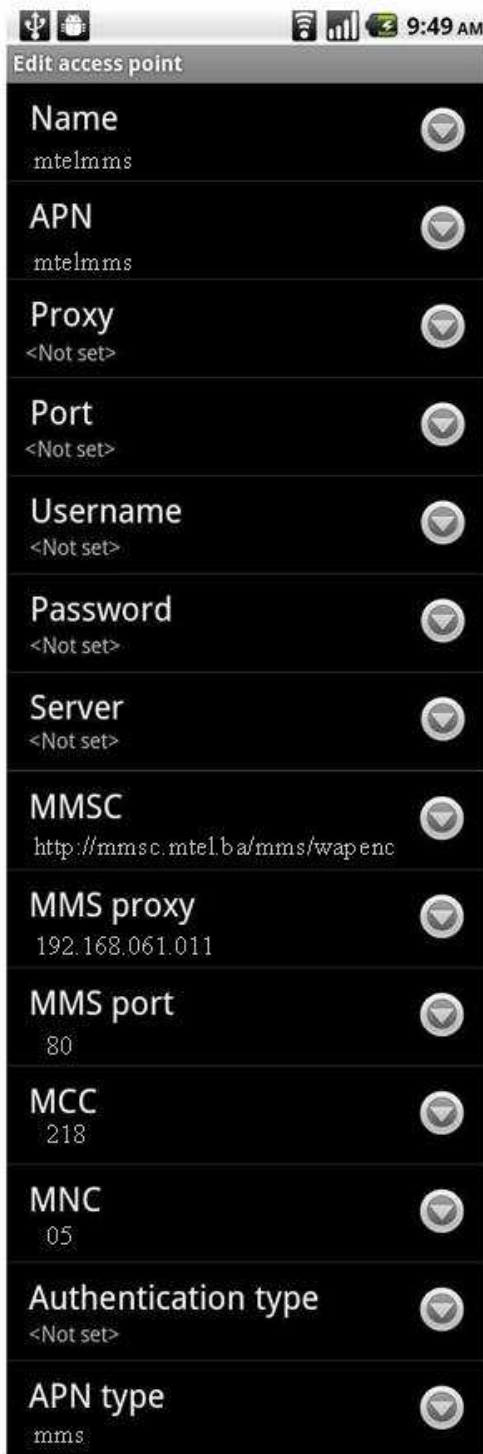

imate prijatelje!
